

PROVIDING FOSTER CARE THROUGH THE LOCAL CHURCH

In response to our biblical mandate to care for widows and orphans, FaithBridge Foster Care helps local churches develop independent foster family ministries. We provide recruiting, training, certification and interaction with government agencies, freeing your church to do what it does best—minister to its people and its community.

The FaithBridge approach is a proven one, allowing you to directly impact your community's foster care crisis without shouldering the administrative and legal burdens of running a child placement agency.

- Help educate your church leadership and congregation with an awareness campaign
- Recruit, train and support foster families in your congregation
- Offer a secure, online application that helps families get approved faster and stay compliant
- Provide best practices standards for training and operations
- Engage volunteers to support foster families and children served by your congregation
- Assign a dedicated consultant who is available 24/7 for foster families and who handles all communication with government agencies
- Coordinate respite care and emergency placement resources

WHAT WE DO

- Create a ministry opportunity for caring individuals and couples who want to love and nurture children in need
- Develop a small group ministry for foster families who share experiences along the same journey
- Enable foster parents to experience the joys and challenges of parenthood, preparing them for the possibility of adoption—should that option become available
- Deepen relationships with foster families and strengthen their bonds with the church
- Provide care to local children and families in need, surrounding them with an entire group of caring individuals

BENEFITS FOR CHURCHES & CONGREGATIONS

GOT QUESTIONS? READY TO GET STARTED?

If your church is ready to heed its call to care for local children in need, please visit us at www.faithbridgefostercare.org or contact us to learn about starting a Christian foster family ministry in your area.
